WORK HISTORY

Sep 2013 **Projects and Policy Assistant**
to *European Cancer Patient Coalition*
Present *Brussels, Belgium*

For the purposes of this job I have to conduct research on cancer related topics and be able to retrieve important information. I also have to attend and provide support at relevant public events and meetings. Finally I have to reinforce collaboration with other relevant organizations.

- Strong communication skills with our members and collaborators
- Preparation of reports, surveys and presentations
- Contribution to the social media strategies to promote ECPC
- Travelling for meetings and conferences across Europe

Feb 2012 **Research Assistant**
to *Institut du Cerveau et de la Moelle Epinière*
Jun 2012 *Paris, France*

The main field of research was Consciousness and Behavior. I collaborated with Dr. Lionel Naccache. I had to use a variety of analytical techniques to solve problems and develop creative solutions to those. I had to demonstrate a high degree of originality and creativity for the design of the different experiments. I also acquired good organisation skills from my powerpoint presentations as well as excellent oral presentation skills.

- Statistical analysis with ANOVA
- Wrote scripts on MatLab
- Strong power of analytical reasoning
- Collected and worked with 80 participants

EDUCATION

Sep 2011 **Université Pierre et Marie Curie (in collaboration with École**
to **Normale Supérieure)**
Jun 2012 *Paris*
Master Recherche de Sciences et Technologie, Spécialité Neurosciences
(Mention Bien)

My main field of Study was Behavioural Sciences and Cognitive Psychology. My courses included: "the Social Brain", "Social and Economic Behaviour" and "Genetics and Behaviour".

- Opportunity to discover a new educational system
- Mastered French language
- Submitted an article as second author in the journal "Frontiers in Decision Neuroscience"

Oct 2010
to
Sep 2011

University College London
London
Msc in Brain and Mind Sciences (Merit)

Main field of study: Cognitive and behavioural psychology and cognitive and clinical neuroscience. I met patients with brain deficits while based in the Institut of Neurology. I read numerous research papers and learnt to establish effective systems for information retrieval. I did my research project in the department of psychology of UCL. I had to acquire good observational and analytical skills for the purposes of my project.

- Research project on "Consumers choices during online shopping on Amazon"
- Wrote Neuropsychological Reports

Oct 2007
to
Jul 2010

University of Warwick
Coventry
Bsc in Biomedical Sciences (2:1 honors degree)

My main courses were: Epidemiology, Pharmacology, Immunology, Oncology, Biostatistics, Infections Diseases and Health, Modern Approaches to Human Diseases, Microbiology and Virology. I had to work in laboratories for most of my studies. It helped me build a strong sense of teamwork and purpose but also display leadership traits appropriate to the situation.

- Research project on the "Placebo effect"
- Learnt to write lab reports and essays with remarkable clarity and consistency
- Excellent level of English

Sep 1995
to
Jul 2007

European School of Brussels III
Brussels
European Baccaureate (87,32%)

My main fields of study were Sciences: Chemistry, Biology and Mathematics. I also did courses in Philosophy, History and Geography.

- Excellent level of Greek and French
- Class representative for 2 years
- Member of the school's volleyball team

SOFTWARE/SYSTEMSKILLS

- Microsoft Office (Excellent command of Word, Excel and PowerPoint)
- MatLab (Stats toolbox, Psychtoolbox)
- iPhoto and Picasa

LANGUAGE AND OTHER SKILLS

- Speak, read and write fluent English, French and Greek
- Intermediate level of Spanish
- Worked on set design, makeup and crew for 5 theatrical plays (3 Warwick University productions and 2 Independent theaters)
